

## **AUTOMATIC CENTRIFUGAL CLUTCHES — 400 SERIES**

### **APPLICATIONS**

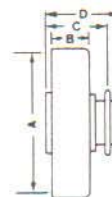

**Go-Karts, Mini-Bikes**

### **HDN 400 SERIES Heavy Duty Needle Bearing**

#### **CENTRIFUGAL CLUTCH FEATURES**

Use the HDN 400 Series when you need a heavier duty clutch than our 400 Series Self-Contained or other economy clutches. Needle bearings provide longer life, higher heat resistance, needs lubricated less often than bushings. Bearings are lubed with grease, not oil. Springs are higher quality, more heat resistant than conventional clutch springs. Tested in harsh commercial applications.
